

KUALI COEUS

An Innovative Approach To Support Innovative Research

FINALLY, ONE SYSTEM FOR RESEARCH MANAGEMENT

Institutions have struggled to find a system that meets all of their complex research needs. rSmart Kuali Coeus provides one integrated system to support research. From the search for funding through closing out the award.

rSmart Kuali Coeus includes:

- Proposal development
- Budget development
- Grants.gov system-to-system submission
- Proposal hierarchy /proposal logs
- Award management

With rSmart Kuali Coeus, you will:

- Reduce errors that put research dollars at risk
- Improve compliance
- Eliminate redundancies
- Increase efficiency
- Ease planning and oversight

KUALI COEUS

An Innovative Approach To Support Innovative Research

WHATEVER YOUR RESEARCH ADMINISTRATION NEED, rSMART KUALI COEUS PROVIDES THE PATH TO SUPPORT IT

Research Need	Legacy System	rSmart Kuali Coeus
Routed proposal submitted through Grants.gov	Paper forms + inefficient submission method	Online routing, eliminates duplicate entry, S2S submission
Proposed work has animal subjects	Self-reporting on proposal, no validation of approval	Protocol lookups ensure status of compliance
PI has perceived conflict of interest	Self-reporting on proposal, no validation of approval	Proposal routing can be halted if compliance not met
Budget is reviewed 3 times before it is accepted	Varying degrees of budgeting experience	Complex calculations engine prevents errors
Award receipt, contract negotiation	No management reporting on these activities	Award entry/tracking, length of management reporting, T&C templates
Reporting requirements	Data entry in logging & tracking notifications	Award templates, notifications

THE PATH TO AN EFFECTIVE RESEARCH ADMINISTRATION SYSTEM STARTS WITH rSMART

You know what you need from a system. Rather than having a software vendor tell you whether the system will meet your requirements, try it yourself with rSmart's Proof of Concept for Kuali Coeus.

In as little as two months, stakeholders across your campus gain hands-on experience with rSmart Kuali Coeus to:

- Validate that Kuali Coeus will meet your needs
- Gain broad support for the project
- Jumpstart your implementation process

KUALI COEUS

An Innovative Approach To Support Innovative Research

The rSmart Kuali Coeus Proof of Concept includes:

- Hosted implementation of rSmart Kuali Coeus
- Configured system loaded with your institution's proposal and award data
- Assessment and high-level fit gap
- Complete hands-on evaluation training
- Comprehensive technical and functional training
- Project management through POC engagement

The rSmart team will work with you to configure the system, load it with your proposal and award data and other key data structures. Subsequently, your users will be able to effectively evaluate the system using familiar proposals and awards.

Specifically, campus stakeholders will be able to:

- Create a budget and a proposal
- Electronically route a proposal through an institutional review process
- Submit an institutionally approved federal proposal through the Grants.gov test server
- Initiate Kuali Coeus transaction maintenance eDocs (to set up categories of proposal types, etc.)
- Initiate Kuali Coeus transaction eDocs (to enter budget data into a proposal, etc)
- Add members to roles
- Set up parameters and workflow rules
